

Adobe® CQ 6®

AEM Forms for AEM Developer

Duration: 2 Days | 16 Hrs

Know Tomorrow Today

Course Description:

This two-day course provides you with working knowledge on AEM Forms. The course includes theory about AEM Forms features followed by hands-on exercises. The participants will learn to create adaptive forms, add form components, leverage existing XDP assets to create form, digitally sign the forms, initiate reviews, localize the forms, integrate adaptive forms with web services, and integrate forms with Analytics.

Target audience:

This course is suitable for developers who intend to work with the Forms capability of AEM. The participants should have attended the AEM Sites: Developer course or have equivalent experience in AEM component development.

Objectives:

After completing this course, the participant will be able to:

- Identify the various Form packages
- Create Adaptive Form template
- Integrate XDP file with the adaptive form
- Customize the template appropriately
- Perform a Review process
- Create Forms Portal using Document Services component
- Configure EchoSign with AEM Forms
- Localize the forms
- Integrate forms with web services
- Integrate forms with Analytics

📌 Agenda: Day 1
